

Connecting to the Internet in St Annes College

Connecting to the Internet

- *Wired*: Plug your network/ethernet cable into one of the network points provided in your bedroom. If you have forgotten your cable these are available to purchase from the College Lodge.
- *Wireless*: Search for and connect to any **Conference** wireless access point. N.B. access points are 'open access' and no WEP key is required. N.B. Your machine may detect other wireless networks such as OWL – it is essential that you connect only to the **Conference** wireless network.
- Please note that once plugged in or associated with the Conference wireless it can take a minute for your machine to connect to the registration network.
- Open a web-browser and connect to a web-site, e.g. <http://www.google.com> - you will be re-directed automatically to a registration page.

Network Registration

St. Anne's College

Why have I arrived at this page?

You have arrived at this page because you have attached an unregistered computer to the college network.

In order to connect to the network you need to authenticate and submit your computer to be vetted to ensure that it meets the required standards to be allowed on the network.

If you are a **member of St Anne's College** please click on the **Member of College** button below.

Member of College

If you are a **Conference Guest or Visitor** to the College please click on the **Guests and Visitors** button below.

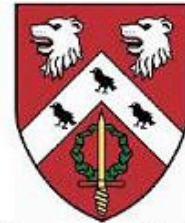

Guests and Visitors

IT Helpdesk - it-support@st-annes.ox.ac.uk

- Click on the **Guests and Visitors** link. You will be directed to the Guest registration page;
